General Sheet Metal For The Construction Industry

ROOF JACK/T-TOPS

PRODUCT:

T-Tops are designed for pitched roof installation. T-Tops allow air movement and combustion release in combustion with attic cavity ventilation systems. Available in galvanized and aluminum for “S” tile roofs.

MATERIAL :

ASTM A653 Galvanized Steel
 ASTM A653 Bonderized Steel
 ASTM B370 Sheet Copper 16oz or 20oz
 ASTM 3003 H14 Aluminum

INSTALLATION:

Vents can be nailed or riveted using conventional hand or power tools. Flashings should be properly fastened to the substrate using wood or metal screws.

Should be used for exhaust of warm, dry air.

This product is not intended for venting grease or liquid.
